

Online Survey on Soybean Farming Practices

María B. Villamil

Department of Crop Sciences
University of Illinois

April 10, 2015

Soybean farmers who take a [ten-minute online survey](#) will help University of Illinois crop scientists and Extension educators to better understand how decisions are made in their farms regarding soybean management and inputs and to tailor programs and projects to improve yields and profitability.

Villamil requests that soybean farmers take the survey within the next two weeks if possible.

The survey is a collaborative effort between the Department of Crop Sciences in the College of Agricultural, Consumer and Environmental Sciences at the University of Illinois, U of I Extension, and the Illinois Soybean Association. The Farm Journal-AgWeb Research is distributing an invitation to participate in the survey by email. If you have not received an invitation, please follow this link to participate https://uiuc.qualtrics.com/SE/?SID=SV_9tr9CwPAucJWRqR.

Questions about the survey can be sent to María Villamil at villamil@illinois.edu or Anne Silvis at asilvis@illinois.edu.
